

Articulate Storyline

Course Duration : 2 days

Course Overview

During this course delegates will learn how to use Storyline to create effective and interactive eLearning projects either for desktop or mobile devices.

The course covers software simulation, handling videos and creating question surveys.

Prerequisites

- Delegates should be confident users of a pc and a good knowledge of the MS Office applications (Word, Excel and PowerPoint) would be an advantage.

Objectives

Delegates will be able to :

- Navigate the Storyline environment
- Create a new project from scratch or from PowerPoint
- Add images, animation, text, audio and video to slides.
- Record narration
- Create question surveys
- Produce surveys with graded questions
- Record the screen and simulate software
- Publish a project for desktop and mobile distribution

Course Content

OVERVIEW

What Storyline does
How Articulate Storyline differs from Articulate Studio
Supporting applications
A tour of the interface and views

STARTING WORK

Creating a new project
Understanding the file types involved in Storyline
Setting or changing the project size

SLIDES

Creating slides
Working with slides in the Story View
Organising slides into scenes
Previewing slides
Slide properties
Slide animation
Slide formatting

WORKING WITH SLIDE CONTENT

Introduction to accessible slide content
Adding simple slide objects
Arranging and resizing slide objects
Formatting slide objects
Timing and the Timeline
Animating slide objects

BASIC SLIDE CONTENT

Pictures and screenshots
Shapes and captions
Symbols and hyperlinks
Photographic and illustrated Characters

ADVANCED SLIDE CONTENT

Web Objects
Scrolling panels
Lightboxes
Flash animations
Zoom regions
Markers

THEMES, SLIDE MASTERS AND LAYOUTS

Themes
Slide Masters and Layouts

AUDIO

Working on the script
Choosing and calibrating a microphone
Recording and editing audio
Importing audio
Synchronising audio with objects

VIDEO

- Adding video
- Editing video

ADDING INTERACTION

- The Trigger panel and Trigger Wizard
- Types of trigger
- Types of events
- Adding triggers
- Buttons
- Hotspots

ALTERNATIVE SLIDE CONTENT

- States
- Triggering States
- Layers
- Triggering Slide Layers

REUSING CONTENT

- Creating and using templates
- Importing PowerPoint slides
- Storyline support for PowerPoint features

RECORDING A SOFTWARE SIMULATION

- Preparing to record
- Setting the recording area size
- Recording options and modes
- Recording
- What gets added during the recording process?
- Mouse paths
- Recording re-use

QUIZZES

- Creating a quiz
- Graded question slides
- Result Slides
- Freeform question slides
- Randomise questions with a Question Bank
- The Feedback master

THE STORYLINE PLAYER

- Customising the Storyline Player
- Importing and exporting custom players

PUBLISHING

- Output for HTML5 and Mobile devices
- Output for an LMS
- Reporting and Tracking
- Other outputs
