

MapInfo Expert - 32 Bit

Course Duration : 1 day

Course Overview

The course is aimed at those who have good knowledge and experience in the use of MapInfo data and the software and are ready to further their knowledge through some advanced MapInfo training. The aim is to give the delegates confidence to use some of the more advanced options and to learn some of the background settings and structure of the MapInfo system.

Prerequisites

- Delegates must be confident in the use of the Windows operating system functions such as copying, deleting & moving files, navigating to a file or folder, use of Mouse and Keyboard.
- Delegates must also have a good understanding of MapInfo with plenty of practical experience or have attended the MapInfo Introduction and Intermediate courses

Software

32-bit version

Course Content

MapBasic Utilities and the Tool Menu

Tool manager – loading tools

Tools which group MapInfo functions - e.g. Concentric Ring Buffers, distance calculator, sync Windows

Tools which add MapInfo functionality - e.g. HTML image map, Universal translator

Tools which make MapInfo easier to use - e.g. Map Window Manager, Named Views, Overview Map

Further Thematic Mapping

Showing more than one attribute on a map - Pie and bar charts or Bi-variate thematics

Thematics produced from joining data - e.g. counts, sums and averages

Grid thematics - theory and uses

The Table Menu

Update column or dynamic browsers - which is best in example situations

Proportional sums, averages and weighted averages - using the MapInfo overlap function

Combining objects from attributes in the browser - using the data to create new objects

The redistricting window - example and explanation

The Object Menu

Combining, splitting and erasing functions - setting a target, effect on the browser data

Aggregation and disaggregation - multi-point objects, one-many points, etc.

Voronoi and table menu Voronoi - natural neighbourhood creation

Convex hulls - bounding areas and their uses

Spatial data checks - intersects and overlaps

MapInfo Pro Set Up and setting preferences

Files, tables and workspace management - how the data fits with the file types and extensions

Table structures with meta data - managing tables and meta data

Table maintenance and packing tables - good practice and what it does to the data

Individual user's menu, shortcuts and preference settings - recommended settings
