Course Duration : 1 day

Course Overview

The course is aimed at those who have good knowledge and experience in the use of MapInfo data and the software and are ready to further their knowledge through some advanced MapInfo training. The aim is to give the delegates confidence to use some of the more advanced options and to learn some of the background settings and structure of the MapInfo system.

Prerequisites

■ Delegates must be confident in the use of the Windows operating system functions such as copying, deleting & moving files, navigating to a file or folder, use of Mouse and Keyboard.

■ Delegates must also have a good understanding of MapInfo with plenty of practical experience or have attended the MapInfo Introduction and Intermediate courses

Software

64-bit version

Course Content

MapBasic Utilities and the Tool Gallery
Tools – registering and running tools
Tools which group MapInfo functions - e.g. distance calculator, sync windows
Tools which add MapInfo functionality - e.g. MapCAD, Grid Maker, Universal translator
Tools which make MapInfo easier to use - e.g. Named Views, Search and replace
USING 32 bit tools – legacy menu

Further Thematic Mapping
Showing more than one attribute on a map - Pie and bar charts or Bi-variate thematics
Thematics produced from joining data - e.g. counts, sums and averages
Grid thematics - theory and uses

Advanced Functions on Table and Map Ribbon
Update column or dynamic browsers – which is best in example situations
Proportional sums, averages and weighted averages – using the MapInfo overlap function
Redistricter – example and explanation
Append Rows – putting two or more tables into one

Advanced Functions on Spatial Ribbon
Combining, splitting and erasing functions – setting a target, effect on the browser data
Combining objects from attributes in the browser – using the data to create new objects
Aggregation and disaggregation – multi-point objects, one-many points, etc.
Voronoi – natural neighbourhood creation
Convex hulls – bounding areas and their uses
Fix/Clean – intersects and overlaps

MapInfo Pro Set Up and setting preferences
Files, tables and workspace management – how the data fits with the file types and extensions
Table structures with meta data – managing tables and meta data
Table maintenance and packing tables – good practice and what it does to the data
Individual user's menu, shortcuts and preference settings – recommended settings
