## MapInfo RouteFinder Pro

---

**Course Duration** : 1 day

### Course Overview

The course is designed for users who need to use the networking, isochrones and drive time capabilities of RouteFinder Pro for MapInfo.

This course is for either versions of V12.5 or any earlier version of MapInfo Pro. The course and instructor will go through the modules in a hands-on approach with the training notes there for back up and revision purposes.

### Prerequisites

- It is assumed that delegates are experienced users of MapInfo.

### Objectives

Delegates will be able to :

- Create and use network derived data within a MapInfo environment.

### Course Content

#### Introduction to RouteFinder

RouteFinder's primary functions  
RouteFinder's data requirements – node/link  
Using the node-link check

#### Network and Settings

How to creating a network from a table, data requirements  
Main route options – modes, direction lists, styles, etc  
Drive time options – zones or donuts, different accuracy levels  
Travelling salesmen settings  
Road speeds – how to set them

#### The RouteFinder Toolbar

Calculating routes and travelling salesmen routes  
Calculating link and multilink drive time  
Calculating polygon or voronoi drive time  
Calculating isogrid and closest centres  
Smoothing  
Updating a point table from the results both time and distance

#### Batch Functions

TSP – from tables  
Selecting locations and the distance matrix  
Route pairs  
Allocating points to a road  
Nearest centres  
Batch drive times

#### MapInfo Pro with RouteFinder results

Updating columns  
Proportional sums and averages for overlapping isochrones  
Data and file management
